WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Axle: 20 mm bright steel bar, 850 long, ends chamfered 1 mm.

Drill a 4 mm cross hole 6 from each end for the R-clips.

Spacers: two 32 x 22 mm tube pieces, 22 long, ends square and deburred; they sit between the outer axle plate and the wheel hub.

Collars: two 20 mm shaft collars with set screws, 12 wide, against the outside of each hub.

Order on each side, from the middle out: inner plate, rail, outer plate, spacer, wheel hub (75 long), collar, R-clip.

Check: with both wheels on, the axle end float is 1 to 2 mm.
