WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Blank 560 x 530 mm. Cut an 80 mm square out of each corner.
Holes in the floor, before folding: six 12 mm drain holes at 120 mm spacing across and 200 mm along; four 9 mm bolt holes, 145 each side of the centre line, 120 in front of and behind the middle.
Fold the four sides up 90 deg to 80 tall; tray 400 x 370 outside.
Pop-riivet or spot-weld the corners; paint the cut edges.
Fit: the tray sits on the bearers and front cross member tops, centred, its front edge 5 behind the front cross member's front face; four M8 bolts through the bearer tops, nuts below.
Check: the tray sits flat and clears the handle arms by 30 mm.

CampBreak hose tray: making sketch
