WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 440 x 300 mm from 3 mm aluminium; round the corners 10 mm.
Two 9 mm holes on the centre line, 60 from the top and bottom edges.
Print the instructions in the camp languages with pictograms:
leave first, raise the alarm, fetch the cart, small fires only,
never water on oil or live wires, call the fire service, and
go when two arrive: the first two take the cart, within 30 s.
Fit: on the front face of the back right post, bottom edge 1,100
above the ground, two M8 bolts through the post.
Check: readable from 5 m in daylight.
